### **Reasons for Allowance**

Claims 1, 2, 6, 7, 10-16 & 18-20 are allowed.

The following is an examiner's statement of reasons for allowance:

The previous action mailed 24 DEC 2008 was an Ex Parte Quayle Office Action wherein the application was found to be allowable except of minor objections raised to claims 6, 7, 18 & 19 wherein the claims were dependant on canceled claims. The amendment has corrected these dependency errors and the case is now in condition for allowance.

Claim 1 is allowable because the prior art of record does not teach or fairly suggest an overvoltage protection magazine comprising all the features as recited in the claims and in combination with the printed circuit board defining ground contact pads on opposite sides of the printed circuit board at the top of the printed circuit board, each of the ground contact pads extending from the front to the rear of the printed circuit board; and at least one ground contact in the form of a forked contact coupled to the housing, the ground contact being configured to mate to at least one of the ground contact pads of the printed circuit board.

Claims 2, 6, 7 & 10-12 are allowable as they depend from claim 1, which is also allowable.

Claim 13 is allowable because the prior art of record does not teach or fairly suggest an overvoltage protection magazine comprising all the features as recited in the claims and in combination with the second end of the printed circuit board defining a first ground contact pad at a first side and a second ground contact pad at an opposite, second side; and at least one ground contact in the form of a forked contact coupled to the housing, the ground contact being configured to mate to at least one of the ground contact pads of the printed circuit board.

Claims 14-16 & 18-20 are allowable as they depend from claim 13, which is also allowable.

Although Kane teaches the forked ground contacts (20) as cited in the claim, Kane does not teach that the circuit board has first and second contact pads or that the forked contacts are coupled to the housing then mated to ground pads. Rather, the forked contacts appear to be soldered onto the circuit pad which is then slide into the housing.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SCOTT BAUER whose telephone number is (571)272-5986. The examiner can normally be reached on M-F 9am-6pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Elms can be reached on 571-272-1867. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
